SDE with 1.5 years at Mastercard, proficient in Java, Microservices and Expert at Codeforces

EXPERIENCE

- Mastercard** Vadodara, India
June 2024 - Present
 - Software Engineer 1 (Full-time)
 - Built **Mastercard's Digital Card Art Service** as a core engineer; developed 5 scalable Java/Spring Boot microservices with production-grade quality; hands-on experience with Jenkins CI/CD and HashiCorp Vault.
 - Delivered **15+ production features** for **MDES Token Connect** and **MDES Pre-Digitization services** consumed by **100+ issuer banks**, **50+ digital wallets**, and **1,000+ merchants**.
 - Improved service performance by reducing response time **20x** from **600ms to 30ms** through query optimization and indexing and achieved an additional 76% speed-up through Redis caching.
 - Deployed microservices across **2 regions and 4 global data centers** using Cloud Foundry.
 - Recognized for contributions to Digital Card Art Service, resulted in **Leading and coaching a team** of interns to develop 2 microservices using **Kafka and Spring Scheduler**.
 - Mentored 5 software engineers**, improved on-call production stability by reducing customer-facing issues, performed peer code reviews, and integrated GitHub Copilot into MCP workflows to increase productivity.
- Software Engineer Intern** May 2023 - July 2023
 - Built 3 types of DB Scheduler for job processing including Oracle, Quartz and Auto Scheduler, load monitoring by detecting low load and processing 1M rows in 30s, through async parallel multi-threading and connection pooling.
 - Promoted from Intern to Full-Time Software Engineer at Mastercard after 2 months of high performance.

SKILLS

- Languages:** Java, Go, JavaScript, Python
- Technology:** SpringBoot, Kafka, NodeJS, MongoDB, Deep Learning, AI, NLP
- Tools:** Docker, Git, Oracle SQL, Jenkins, Splunk, Dynatrace, IntelliJ, VS Code, Power BI, Bitbucket, Confluence
- Cloud:** AWS, GCP (Google Cloud), PCF (Cloud Foundry)

INTERNSHIP

- Simulas** Remote
May 2022 - July 2022
 - Summer Intern
 - Developed RESTful APIs with Node, Express, MongoDB, AWS S3, and Google Cloud; led database migration
 - Improved system by 430% faster, sorted 30+ issues, caching to improve by 15x (30s reduced to 2s).

PROJECTS

- Competitive Coding Hub (Source Code):** Full-stack DSA practice platform with code editor, problem contributions, and solution backup. Tech: MongoDB, Angular, Node, Express, Flutter.
- NLP Part of Speech and Morphological Analysis (Research Paper, Source Code):** Designed a deep learning model for Gujarati grammar prediction, achieving 95% accuracy for POS and MORPH tags, hosted on Super Computer at DDU.
- AI based Reasoning Framework for Ancient Indian Texts (Research Paper, Source Code):** Architected an AI reasoning framework on 88k ancient Indian paragraphs using FAISS vector search and Mistral LLM, Python, Streamlit UI.
- AI Search Engine (Source Code):** Real-time search engine with Mistral LLM-powered answers + source references, implemented embeddings, vector search, and API orchestration. Tech: Mistral LLM, Python, Streamlit, Node, Playwright.

ACHIEVEMENTS

- Awarded 3 Gold Medals for 1st rank at Dharmsinh Desai University - May 2024.
- Secured Global Rank 1 in GeeksForGeeks Contest 105, outperforming thousands of competitors.
- Global Rank 64 in Codechef 43B Contest.
- Global Rank 288 in Codeforces 832 Contest.
- Published 2 Research Papers on NLP Gujarati Grammar Tagging (1), AI Reasoning Framework for Ancient Text (2)
- Gate Computer Science Qualified'25 - All India Rank 2458.
- 5th Place in Bhashathon'25, for Audio Speech Recognition.

VOLUNTEER EXPERIENCE

- Community Lead at DDU Coding Community** Nadiad, India
June 2022 - Present
 - Pioneered competitive coding culture by training nearly 1000 students.

EDUCATION

- Dharmsinh Desai University** Nadiad, India
October 2020 - May 2024
 - Bachelor of Technology - Computer Science'24; GPA: 9.73, 3 Gold Medals
